**AND TRACING PATTERN**

**Pocket  
Initials**

Complete  
Initials  
Contained in  
Craftaid #2540

# HOW TO CARVE YOUR LEATHER PROJECT

## PREPARING THE LEATHER

- A. Use a sponge to dampen leather.
- B. Spread the leather to be decorated grain or smooth side up on a smooth board. Dampen the entire piece. Do not get leather sopping wet.
- C. Use tracing paper to trace design outlines from pattern. Clip tracing to damp leather.

### Step 1—Tracing Design

Trace the outline of the design on leather with tracing tool or sharp pencil. If leather becomes dry, dampen it again. When it turns back to its natural color, resume work.

### Step 2—Carving

Use swivel knife to carve design. Cut outlines in the following order: flowers, stems, leaves, scrolls, etc.

### Step 3—Camouflage

Use camouflage to add roundness to scrolls, leaves, stems, etc.

### Step 4—Shading

Use shader to add shading or deep burnished color to leather . . . use on flower petals, leaves, etc.

### Step 5—Beveling

Use beveler to stamp down one side of cut only. Push beveler along inside of swivel cut. Smooth even bevel is very important.

### Step 6—Veiner - and Seeder

Use veiner to add decorative effect on scrolls and flowers. Seeder to complete flower centers.

### Step 7—Background

Use background tool to stamp down background areas, dark areas on pattern. Add decorative cuts with your swivel knife.

When all tooling and stamping have been completed, clean and polish leather with Tan-Kote. Then apply a protective coating of Neat-Lac—Tandy's special leather finisher containing essential oils and waxes to preserve and protect leather.
