

From Tony Laier's Bench:

"Meander" With Double Line (Bead) Border
Using D444 & B893

You will need stamps D444 & B893, straight edge, stylus, beveler of your choice, modeling tool and swivel knife. (Use D443 or D445 for different sizes.)

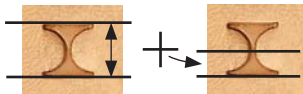

A) First make a light #1 guideline on your cased leather at desired distance from edge of your project. Use a straight edge and stylus.

B) Scribe #2 guideline 1/8" from #1.

C) Measure face of tool and add 1/2 that measurement.

D) Using measurement above (1-1/2 x face of tool), scribe #3 guideline.

E) Scribe #4 guideline 1/8" from #3.

F) Cut guidelines with a swivel knife run along a straight edge. Round off double line (bead) borders with spoon end of a modeling tool. Drag tip of B893 along rounded beads to create a texture. If desired, bevel inside double line beads with your choice of a beveler or use the spoon end of a modeling tool.

G) Begin stamping aligning stamp on #2 guideline. Make next impression off of #3 guideline as shown. Continue.
