

Doodle Page Digital Download

This PDF file contains 1 (one) Doodle Page. The PDF has been put together to give you options when it comes to printing. Pages and patterns that are larger than 8½x11 have been provided in two formats:

1) Full Size

If you would like to have a full size print out, take the full size pages to your local print shop and they can print it for you. All full size Doodle Pages are 11x17

2) Tiled

The tiled pages give you the option of printing the full sized Doodle Pages at home. You print the tiled pages and then assemble them to make the larger patterns.

The Doodle Page PDF files are typically laid out like this:

Front – full sized, front – tiled, back – full sized, back – tiled

(Some Doodle Pages do not have backs)

Please note: When printing on a home printer, the edges may get cut off. To avoid this, make sure “Page Scaling” is set to “Shrink to Printable Area” in the Adobe Reader print dialogue box. This will decrease the size of the Doodle Page a very small amount.

You may take this PDF file to your local print shop to have the full-size pages printed for your own personal use.

MAKING FLOWER CENTERS

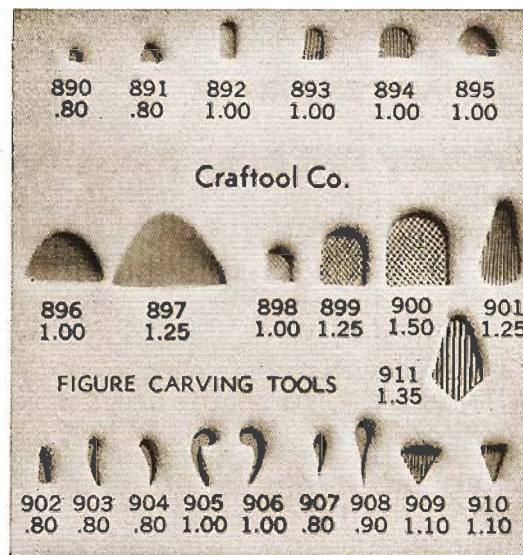

CRAFTTOOL OF THE MONTH

This month's Doodle Page features Crafttool #911 . . . shown with the new figure carving tools. This tool is actually a 3 in 1 stamp. It is a pear shaver, a ribbed beveler left, a ribbed beveler right. This enables the craftsman to bevel both sides of a midrib with angled serrations without changing tools, as on the oak leaf in the center of the page and the two leaves at its right.

Notice how #911 was used on the acanthus leaves in the upper left hand corner. It is also used to form radiating lines from the flower centers and give the seeds a "set-in" appearance. #911 adapts itself well to the scrolls. Many interesting combinations can be formed.

Space here does not permit all the uses of Crafttool #911. Try it yourself on scrap leather and discover its amazing qualities. Doodle with it just as Al Stohlman has this month with the peacock. Try it on a bag!

Some of the other new tools, Nos. 903-904-905-906-907-908, are all designed as "stops" and are shown in various uses on this page. Try them!
