

## Doodle Page Digital Download

This PDF file contains 1 (one) Doodle Page. The PDF has been put together to give you options when it comes to printing. Pages and patterns that are larger than 8½x11 have been provided in two formats:

### 1) Full Size

If you would like to have a full size print out, take the full size pages to your local print shop and they can print it for you. All full size Doodle Pages are 11x17

### 2) Tiled

The tiled pages give you the option of printing the full sized Doodle Pages at home. You print the tiled pages and then assemble them to make the larger patterns.

The Doodle Page PDF files are typically laid out like this:

Front – full sized, front – tiled, back – full sized, back – tiled

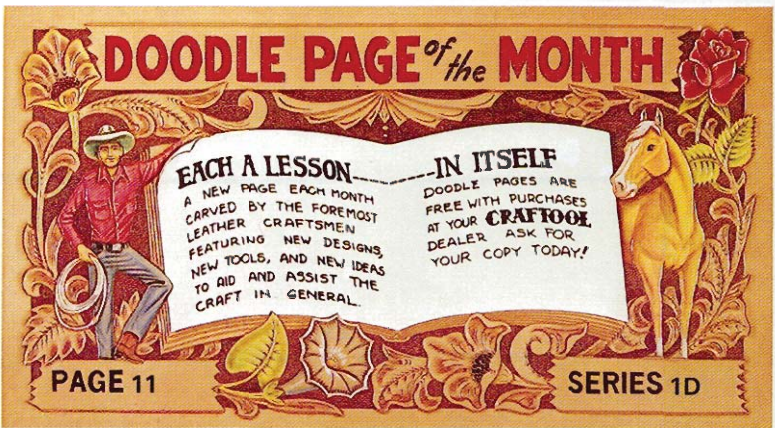

(Some Doodle Pages do not have backs)

Please note: When printing on a home printer, the edges may get cut off. To avoid this, make sure “Page Scaling” is set to “Shrink to Printable Area” in the Adobe Reader print dialogue box. This will decrease the size of the Doodle Page a very small amount.

You may take this PDF file to your local print shop to have the full-size pages printed for your own personal use.

## "Sport Bands & Tags"

by Dan Noland

Here are three sports bands and tags I hope you will like. These designs are in sets, one band and tag for each design. Or you can make one of each or whatever way you want. Anyway, I hope you like the designs I have made.

First trace the pattern onto the leather and cut out your design. Make sure you don't cut the dotted lines shown on the tracing pattern. Some lines are cut lightly, others are cut deeper to make the carving stand out.

Next the beveling is done, (I used tools no. B701, B702, and B200) then complete the background using the tools as shown or ones of your own choice. For the beveling just look at the design to see which side of the design to bevel on.

For the sports band you can use snaps or buckles to hold it together. You may have to lengthen or shorten the band to fit your wrist. I'd get a piece of paper or whatever and wrap it around your wrist so it will fit. Leave an overlay so you will leave enough room so you can put the snap on without any problems.

For the tags, punch a hole where shown on the Photo-Carve Pattern for a jump-ring to be added for a chain or leather thong.

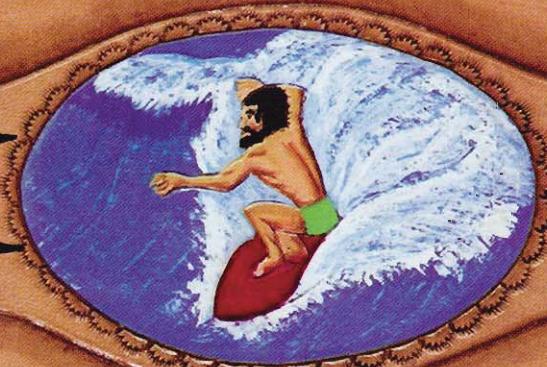

After they have been tooled you can cut them out and then color them the way I have or any way you want. Cova Dye works very well for nice bright colors. Mix them the way you would mix oil paints to achieve the desired colors.

I hope you will enjoy making these designs (remember for best results take your time and make sure you don't goof.) Good luck in your carving.
